2018

Full Stack Web Development, Ruby on Rails and JavaScript Immersive Program

Nassau Community College, Garden City, NY
2016 - 2018

Two years of coursework towards Associate Engineering Science Degree, including: Calculus levels I-IV, Engineering Physics I and II, Engineering Circuits I and II, Microeconomics

TECHNICAL PROJECTS

Eatup – Github | Demo
Allows restaurants to upload their menu and receive online orders in real time

+ Built a restful API using Ruby on Rails
+ Employed action cables and web sockets to allow real time features, including search, ordering and order updates for both customers and managers
+ Developed front end incorporating React, Redux and Semantic UI React for the user interface design

Flatiron University – Github | Demo
A platform for students and professors to manage their school related activities such as course registration, grading and etc.

+ Employed Ruby on Rails along with standard design patterns to develop an MVC app
+ Worked with "sessions" to store the logged-in status
+ Implemented required logic to redirect users from unauthorized views
+ Used "bcrypt" gem for authentication and storing encrypted password in the database
